

SÉRAC

SÉRAC

REF. OT-S26-GL · THE ESSENCE OF ICE

Where a glacier breaks, it does not crumble. It cuts.

High on the icefall, pressure and time fracture the glacier into towers of perfect geometry — séracs. The Sérac carries that fracture on the wrist: a true square of 26 millimetres in 925 sterling silver, corners cut, not curved, its powder-blue dial brushed so light spreads across it the way frost takes glass. Around it, a frame of round brilliant stones, each held by metal moved to grip it — because pure silver alone is too soft to hold a stone. **THAT IS WHAT THE 925 MEANS.**
